

# RoboLoader™ Pipet Tip Loader

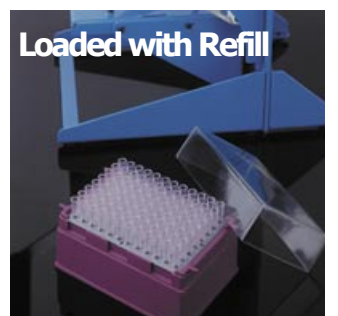

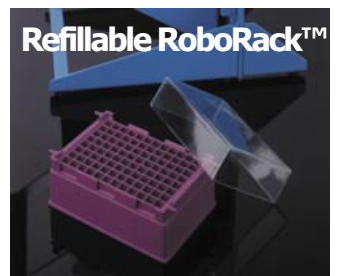

for automated pipettors

- Cuts Plastic Waste by 90%
- Works with Most Pipettors
- Saves Labor and Materials
- SBS Format Racks
- Sturdy Refillable RoboRack™
- Tips for popular pipettors

Now from Labcon the RoboLoader™ and Refillable RoboRack™ system. Now you can instantly dispense 96 tips into the refillable RoboRack™ and eliminate all the waste from disposable tip racks. And the RoboRack™ with its extra strong construction can be used again and again, even if you autoclave. The RoboRack™ was designed with the new SBS format standards so it works with all SBS compliant pipettors.

The RoboLoader™ is available freestanding, as fixed workstations, and wall mounted. RoboRacks™ are available empty or prefilled.

# RoboLoader™ system for refilling robotic pipet tip racks

- Reduce tip loading time to seconds
- Reduce packaging waste over 90%
- Reduce assay processing costs

## Simplify Your Pipet Tip Racking

- Increase assay throughput
- More efficient tip storage
- Easier handling with refills vs. racks
- Reduced risk of RNase and DNase contamination
- Quality Assured specifically for HTS robotics

## Reduce Packaging Waste Over 90%

- No plastic racks or boxes to throw away

## Reduce Your Manpower Needs

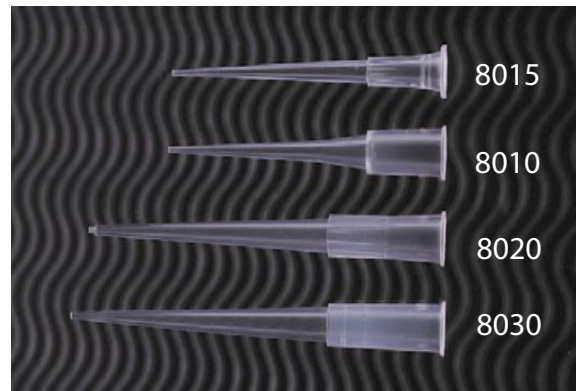

- Easier to load pipet tips
- Less manual handling
- Easier to receive
- Easier to inventory

## Reduce Your Assay Processing Costs

- Reduced disposal costs
- Reduced manpower needs
- Recover valuable shelf and storage space

This refill neatly contains all the pipet tips for your system without 90% of the packaging waste.

Tips available for most pipetting stations

Refills are available for Beckman MultiMek®, Biomek®, Zymark SciClone®, Zymark Benchmate®, Zymark RapidPlate®, Zymark Allegro® and Tecan Genmate® pipettors.

Tips are available in polypropylene, SuperSlik™ Low Retention, and aerosol filtered versions.
